

H1N1 Equals Influenza-A According to the EPA

2009-11-25 15:36:07 (GMT) (WiredPRNews.com - Health & Fitness, Press Releases)

Arlington, VA (WiredPRNews.com) – At last month's 9th Annual ISSA Antimicrobial Workshop in Arlington, Virginia the Environmental Protection Agency (EPA) announced products registered to kill Influenza-A will be considered to be effective against this year's H1N1 strain.

More specifically the EPA states that "...currently registered Influenza-A virus products will be effective against the 2009-H1N1 flu strain and other Influenza-A virus strains on hard, non-porous surfaces. For safe and effective use of these products, always follow label instructions for these products, paying special attention to the product's dilution rate (if applicable) and contact time."

According to the EPA, when ozone concentration in water is 0.3 parts per million or higher, it is considered to be equivalent to 50 parts per million of chlorine bleach in solution, and strong enough to work as a sanitizer. The fact that our customers use the same Sen Safe Oxycheck verification system as many U.S health departments, means we can test to prove that lotus PRO ozone levels high enough to kill H1N1.

Several peer reviewed publications, including the American Journal of Infectious Control, have shown ozone to be an effective flu virus eliminator, as well as a powerful bacteria, mold and mildew killer.

Tersano's lotus technology infuses tap water with ozone at concentrations between 1.5 and 2.0 ppm. Ozone concentrations can be easily tested using simple test strips manufactured by Industrial Test Systems Incorporated.

lotus is the leading chemical-free cleaning solution in the U.S.A. today. From a safety, environmental, and effectiveness perspective lotus Chemical-free Cleaning System is unique in the current marketplace. For more information on the product and company please visit www.tersanoprofessional.com.

Tersano Inc. is a privately held innovations company based in Windsor, Ontario with offices and distribution centers throughout the United States. The company develops and manufactures lotus® Home and lotus® PRO products for consumer and commercial customers worldwide. The company is committed to advancing environmentally safe and healthy cleaning and sanitizing technologies.
