Tersano Donates lotus® Sanitizing Systems™ To Health Facilities in Ghana

*Windsor, Ontario Rotary Club Sponsors Doctor Visits to Ghana For
Delivery and Setup of Donated Systems*

ONTARIO, CANADA (DATE) – Tersano, a company dedicated to changing the way we think about cleaning chemicals, today announced that it has donated several units of its flagship product, the lotus Sanitizing System, to be utilized in two medical facilities in the West African country The Republic of Ghana. The units, which are valued at over \$2,000 and will allow the health facilities to sanitize medical instruments and environments, will be delivered and implemented by a group of Windsor doctors working in conjunction with the Rotary Club of Windsor.

“We are honored and pleased to be working with the Rotary Club on such a worthy endeavor,” said Steve Hengesperger, President of Tersano. “It will be a very helpful addition to the Ghana facilities, which already have clean water and generators to run the units. The lotus Systems will now allow them to sanitize their surgical equipment, which will be a big improvement to the practices they have relied on in the past.”

The compact lotus units developed by Tersano convert the oxygen found in ordinary tap water into a “super” natural oxidant (ozone) which is a safe and natural sanitizer. The resulting ozone-infused water has been proven highly effective as an all-purpose sanitizer for surfaces and other items, as well as a powerful cleaner that neutralizes up to 99.9% of bacteria. The units will be delivered to medical facilities in the Agona district located in the Central Region of Ghana, and in the Jirapa district which is in the Upper West Region. The doctors include Dr. Godfrey

-more-

Bacheyie, who is head of the Neonatal Center at Windsor Regional Hospital and is a native of Jirapa.

Tersano hopes that if the use of the lotus Systems proves successful in Ghana, that the program can be expanded to include placement in medical facilities in other third world countries. “This is just a great cause and a perfect fit for our product,” said Hengsperger. “We are hoping to speak with Rotary International about expanding the program, and would love to partner with organizations like the Bill Gates Foundation or others to make it grow.”

About Tersano, Inc.

A Canadian developer of cutting-edge household sanitizing systems, Tersano is an innovative company that is changing the way we think about cleaning chemicals, and in the process, creating an entirely new market category. Tersano’s state-of-the-art technology improves quality of life and delivers peace of mind by providing consumers tools with which to reduce, if not eliminate, the need for toxic chemicals in their homes.
